

I feel that the FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. I have appreciated not having the burden of unwanted phone calls. These calls have caused consumers to resort to purchasing expensive phone options such as caller id, privacy manager, and voice mail, in the hope to eliminate being subjected to unwanted solicitations. I am a teacher and a parent and know the importance of family time. Please do not allow my time, which is limited, be robbed by unwanted solicitations.
